

prof.
**Witold
Rohm**

Type of tutoring:

scientific and developmental

Language of tutoring:

Polish, English

E-mail: witold.rohm@upwr.edu.pl

Who am I?

I am a scientist, surveyor, co-founder of a spin-off company, I work in atmospheric remote sensing, and human/animal mobility modeling, I love to discuss science, the future of Earth and humankind. I am fascinated by sending objects and people into space. When do you think Space Columbus will need to set out to find a New World? I really like good stories, not necessarily true.

What is tutoring for me?

Tutoring for me is an expedition to the mountains, without a map but with a clear aim.

What do I offer?

I invite you to scientific and developmental tutoring. I help in defining academic goals, ambitious, out-of-the-box, your own, selection of tools to achieve the goals and programming of work to achieve them. I support the formulation and testing of hypotheses, as well as the synthesis of knowledge from different sources.

Who do I invite to cooperation?

PhD students who want to understand why.

Enthusiasts of space exploration and Earth exploration, human/animal interactions.

Activists, entrepreneurs and cyclists. I only accept those who know that science is not an opinion.
